RIFAT ATTHAYA FADIL AHMAD

UI/UX Designer

Indonesia - 22 Years Old

Hiiii,

I'm an 8th-semester Information Systems student focusing on UI/UX Design. During my 9-month internship, I worked on user flows, interface design, and creating BRD documents for several app and website projects.

I enjoy solving user problems through simple and easy-to-use design solutions.

Experience

- **5 Months - Intern as Business Analyst at PT United Tractors Tbk**, Developed business flows, BRD, and design systems to streamline processes and ensure consistency. Delivered intuitive UI/UX designs and high-fidelity prototypes to enhance user experience and project clarity.
- **4 Months - Intern as UI/UX Designer at PT Bina Pertiwi**, Redesigned multi-platform digital products, translated business needs into UI solutions, built supporting databases, and collaborated cross-functionally to ensure successful implementation.

Education

- Bina Nusantara University (Information Systems) 2021 - Now

Skills

- Figma
- Visual Paradigm
- Java (Basic)
- Miro
- HTML (basic)
- CSS (basic)
- JavaScript (basic)
- phpMyAdmin (basic)

PROJECT OVERVIEW.

01 CIE (Clock In Employee)

CIE is a mobile application designed for employees, providing key features such as attendance tracking, project and task documentation through milestones, communication with other registered users within the app, and a comprehensive Employee Self Service (ESS) system.

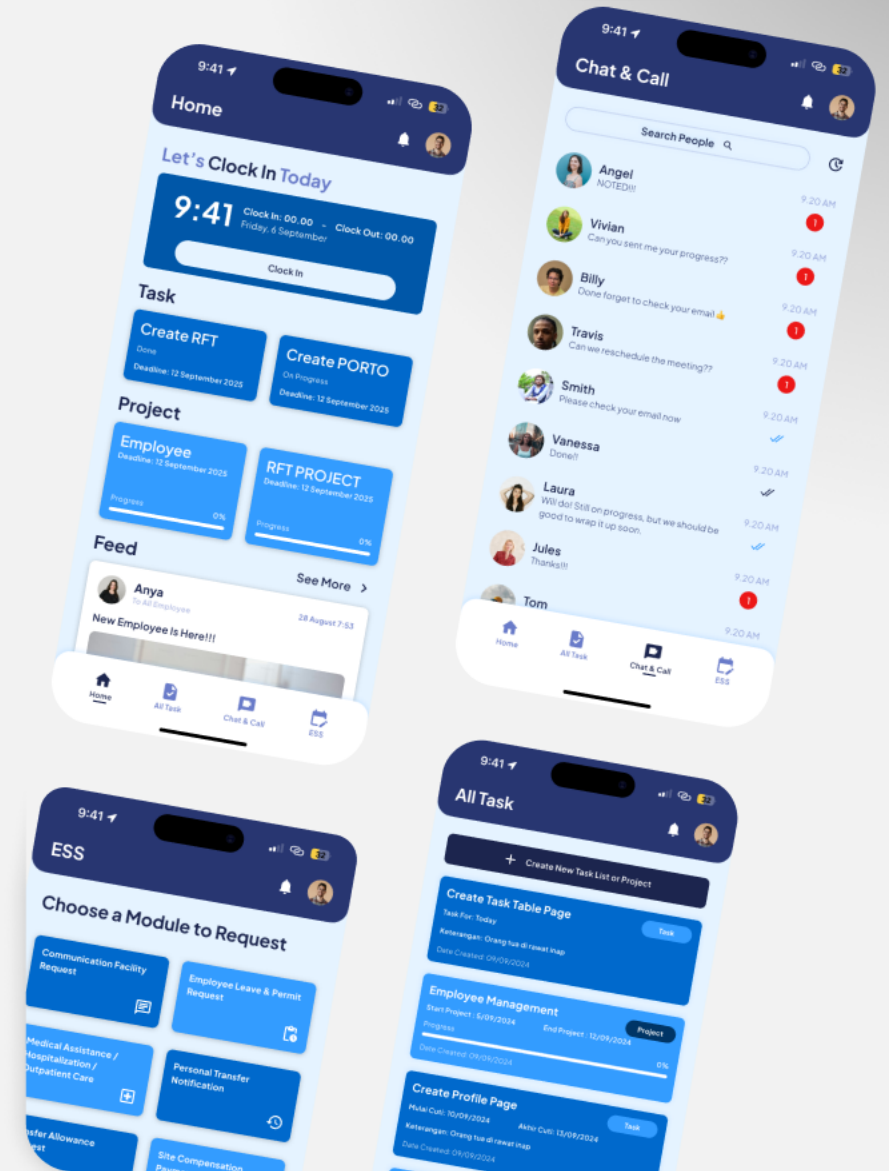

Platform: Mobile

Project Duration: 1 Month

Role: UI/UX Designer

Tools: Figma and Figjam

Project Purpose: This project was carried out with the goal of migrating to a new application that offers a more effective workflow compared to the previous one, along with a user-friendly interface.

PROJECT OVERVIEW.

02 Track Asset

Track Asset is a web-based application designed to monitor and record asset inventory, including the total number of assets owned, assets received into the warehouse, assets dispatched from the warehouse, and the asset distribution across available warehouse areas.

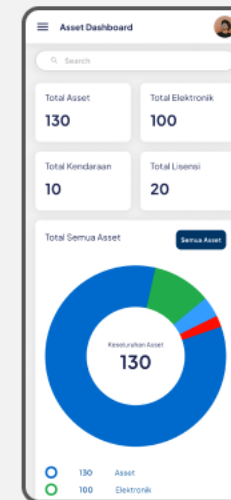

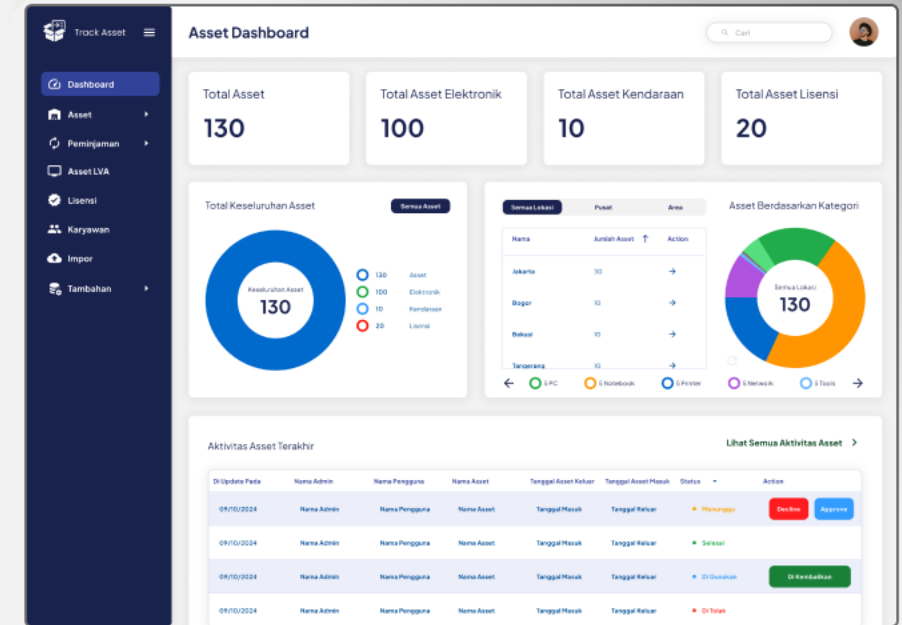

Platform: Desktop/Tablet/Mobile

Project Duration: 4 Month

Role: UI/UX Designer

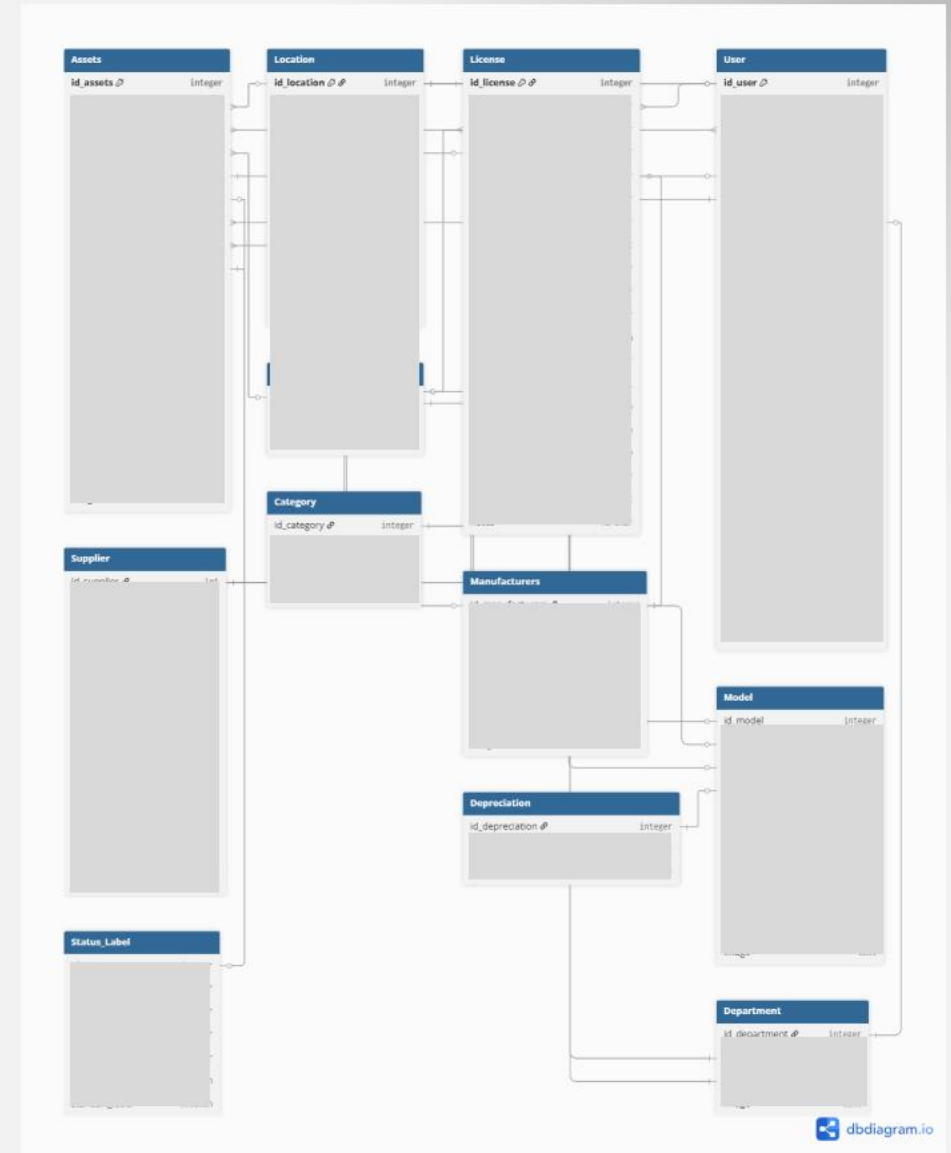

Tools: Figma, Figjam, dbdiagram, and MySQL

Project Purpose: The goal of this project was to enable users to manage warehouse records more effectively. Previously, users found the process inefficient as they had to use two separate applications for warehouse management. This led to a solution to combine both applications into a single new application, utilizing the same database as before.

PROJECT OVERVIEW.

03 EduLab (Case Study)

EduLab is an internal online learning platform designed to help users develop both soft and hard skills through certification-based training aligned with current industry needs.

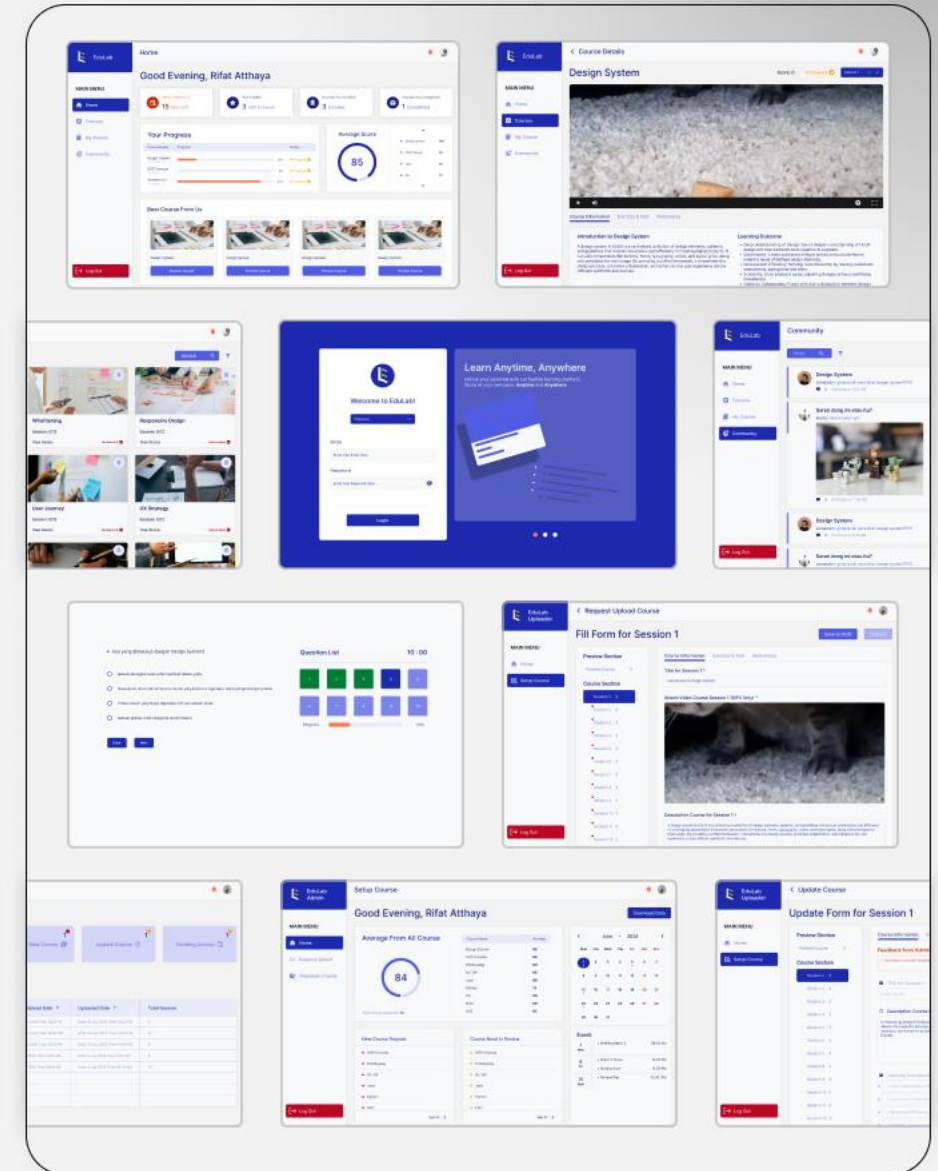

Platform: Desktop

Project Duration: 5 Month

Role: UI/UX Designer and Business Analyst

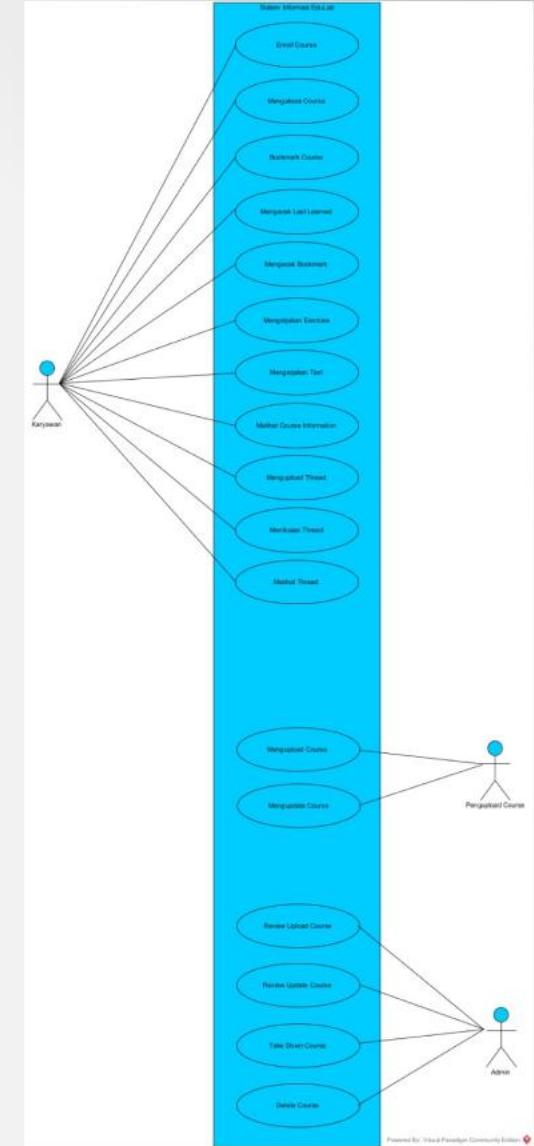

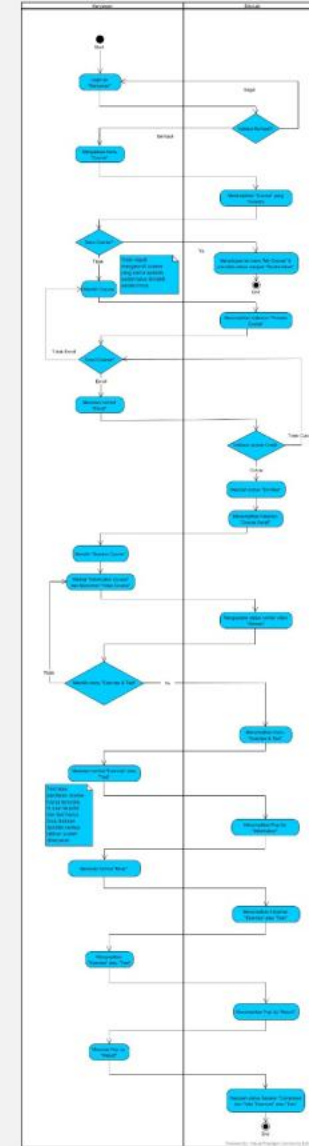

Tools: Figma, Figjam, and VisualParadigm

Project Purpose: This project aims to ensure that the company has employees who meet the required standards for both soft and hard skills, not only for current needs but also for future demands.
