hello there 👋🏻 i’m

SOVIA LAJUBA

Graphic Designer, UI/UX Designer, Web Developer,
Mobile Developer

hello

SOVIA LAJUBA

my name is sovia, a Diploma in Informatics Management student at Jember State Polytechnic with a GPA of 3.75/4.00. I actively participate in Student Activity Units (UKM), seminars, and various trainings that help develop insight and leadership skills. I have a strong interest in Frontend development, graphic design, 3D design, and UI/UX design, which I have applied in various academic and practical projects. My educational background also includes multimedia at SMK Negeri 1 Jember.

WORK EXPERIENCE

Agustus 2024- Desember 2024

PT SWABINA GATRA

During my internship at PT Swabina Gatra, I served as a UI/UX Designer in the Information Technology field. My responsibilities included designing responsive and intuitive user interfaces, adapting layouts for both desktop and mobile views, and implementing designs into front-end development using Bootstrap 5. I was also involved in creating key pages such as Home, About Us, Products & Services, Our Clients, Careers, and News, as well as contributing to back-end development to support the functionality of the company profile website.

Hi! I actively work on projects with my team, collaborating until they are successfully completed!!

This section showcases various projects I worked on during my college years, including several major projects completed in group collaboration. I actively contributed to each stage, from concept planning and design to implementation and testing. These projects were designed to solve real-world problems and served as a platform to apply the skills I have learned. The documentation includes photos of the completed work, explanations of the development process, and descriptions of my role in each project, allowing viewers to fully understand the workflow and final results.

WORK PROJECT

E-commerce website Toko Helm Alvin

Developed an e-commerce website for Toko Helm Alvin featuring real-time stock management, automated transactions, online payments, and customer service. Contributed to UI/UX design, database creation, and front-end & back-end development.

student attendance system mobile application

The application was developed using Java Android Studio, integrating APIs for dat management and authentication. Th project covered UI/UX design, databas creation, attendance logic implementatio and comprehensive feature testing.

student attendance system mobile application

Developed a TNBTS Disaster Reportin System with GPS-based location reportin photo upload, and real-time incide descriptions. Built using PHP, JavaScrip and MySQL to streamline disaster reportin and response in Bromo Tengger Semer National Park.

CERTIFICATE
